SUMMARY

Software Engineer and Full Stack Web Developer with two years of experience and strong competencies in frontend and backend development. Specialist in building modern web applications using technologies such as React, Next.js, Node.js, Python, Docker, and Git. With experience in related technological areas such as databases, data science, artificial intelligence, and project management, I focus on the design and implementation of digital solutions with best practices that are efficient, secure, and scalable.

EXPERIENCE

Lead Software Developer

Municipalidad El Quisco

August 2024 - Present, El Quisco, Valparaíso

- Designed, developed, and automated various custom web platforms and critical administrative processes through self-managed solutions, reducing manual operation times.
- Led the migration of legacy systems to modern technologies, optimizing maintainability and ensuring service continuity.
- Independently managed the infrastructure, handling servers, databases, application deployments, and implementing strict cybersecurity, access control, and backup policies.
- Managed the full lifecycle of IT projects, covering technical planning, development, end-user training, and post-implementation support.
- Led development efforts and coordinated the assigned technical team to ensure the successful execution of the institution's internal projects.

Full Stack Developer | Professional Internship

Duoc UC

September 2023 - December 2023, Viña del Mar, Valparaíso

- Managed an IT project using the SCRUM methodology.
- Developed a complete web application with relational database modeling and implementation.
- Implemented automations that reduced operational times by up to 99% and improved the security, consistency, and availability of information.

Web Developer | Work Internship

TV Costa

February 2023 - March 2023, San Antonio, Valparaíso

- Performed maintenance, bug fixing, and implementation of new features for the institutional website, improving the user experience.
- Developed an Android mobile application to strengthen the company's digital presence.
- Managed the creation of website backups, ensuring service continuity and efficient error resolution.

SKILLS AND LANGUAGES
