SUMMARY

Software Engineer and Full Stack Web Developer with 2 years of experience developing modern web applications and digital solutions. Skilled in frontend and backend development using technologies such as React, Next.js, Node.js, Python, Docker, and Git. Experienced in process automation, infrastructure management, and the development of secure and scalable systems. Knowledgeable in databases, artificial intelligence, software architecture, and project management, with a strong focus on building efficient solutions following modern development best practices.

EXPERIENCE

Software Engineer / Development Lead

Municipalidad El Quisco

August 2024 – Present, El Quisco, Valparaíso

- Designed, developed, and automated custom web platforms and critical administrative processes, significantly reducing manual workloads and improving operational efficiency.
- Led the modernization and migration of legacy systems to modern technologies, improving maintainability, scalability, and long-term service reliability.
- Managed infrastructure and deployments, including servers, databases, cybersecurity policies, access control, backups, and application monitoring.
- Oversaw the full software development lifecycle, from technical planning and implementation to user training and post-deployment support.
- Coordinated development initiatives and collaborated with technical staff to successfully deliver internal digital transformation projects.

Full Stack Developer (Internship)

Duoc UC

September 2024 – December 2024, Viña del Mar, Valparaíso

- Managed and coordinated a software development project using the SCRUM methodology.
- Developed a full-stack web application, including relational database design, backend implementation, and frontend development.
- Implemented automation solutions that reduced operational times by up to 99% while improving data consistency, security, and accessibility.

Web Developer (Internship)

TV Costa

February 2023 – March 2023, San Antonio, Valparaíso

- Maintained and improved the institutional website by fixing bugs, implementing new features, and enhancing overall user experience.
- Developed an Android mobile application to expand the company's digital presence and accessibility.
- Managed backup processes and recovery procedures, ensuring service continuity and faster issue resolution.
